

Q4. Polynomial Plotting with Annotations:

Randomly select the coefficients of a 5th degree polynomial. Set the random seed as the last two digits of your roll number. Plot the polynomial for $-5 \leq x \leq 5$. Annotate the plot to identify the maxima and minima of the polynomial.

```
In [1]: import numpy as np
import matplotlib.pyplot as plt
import sympy as sp
roll_number = 30
np.random.seed(roll_number)
coefficients = np.random.randint(-10, 10, size=6)
